## How are we doing getting people vaccinated against COVID-19?

Percentage of the total population that have completed a vaccine series

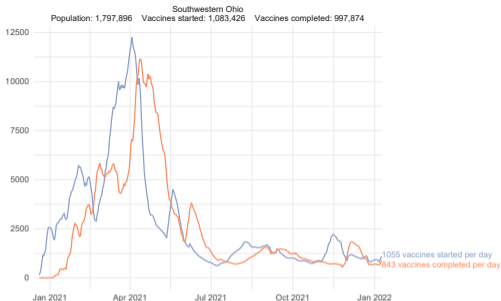

# What is the COVID-19 vaccination rate in the entire population (all ages) over time?

Percentage of the total population with vaccines **started**, **completed**, and with **booster**

Source: CDC County data. <https://covid.cdc.gov/covid-data-tracker/#county-view>. Data as of January 11, 2022. On October 28th duplicate vaccinations were removed from the Kentucky data by the CDC causing a decrease in the rate. Large one day increases are likely due to updates and corrections to the data and not to an increase in vaccines given on that day.

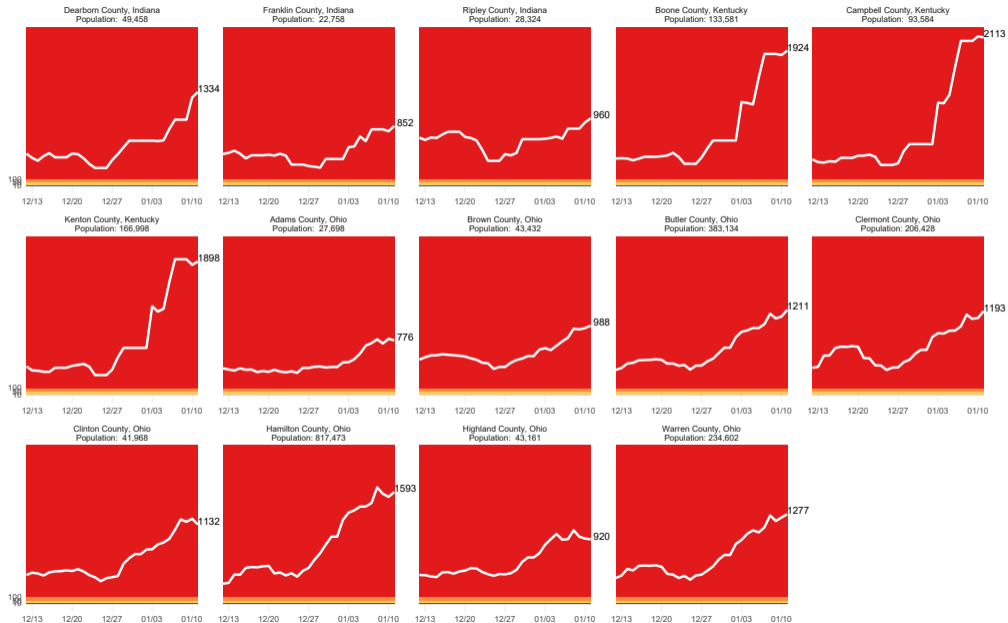

## Seven day moving average, number of vaccines **started** and **completed** in Southwestern Ohio and Southeastern Indiana

Source: ODH. [https://coronavirus.ohio.gov/static/dashboards/vaccine\\_data.csv](https://coronavirus.ohio.gov/static/dashboards/vaccine_data.csv) on January 12th, 2022

### Hamilton County, Ohio

Estimated R

### Fourteen County Region

Estimated R

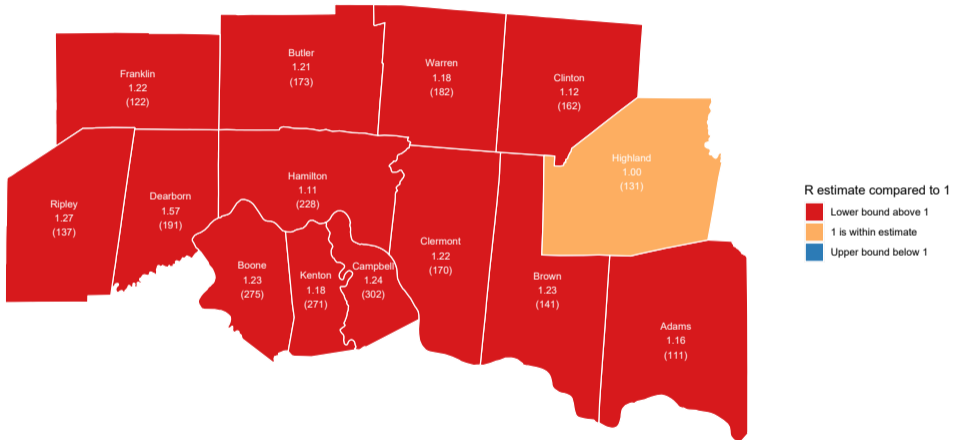

Incidence per 100,000 population and 7-day moving average

Incidence per 100,000 population and 7-day moving average

Map of R estimates for 14 county area with average daily number of cases per 100,000 population in the last week  
Estimated R value is based on the rate of change in incidence cases and should be considered along with the count

### Indiana Estimated R

Incidence per 100,000 population and 7-day moving average

### Ohio Estimated R

Incidence per 100,000 population and 7-day moving average

### Kentucky Estimated R

Incidence per 100,000 population and 7-day moving average

### United States Estimated R

Incidence per 100,000 population and 7-day moving average

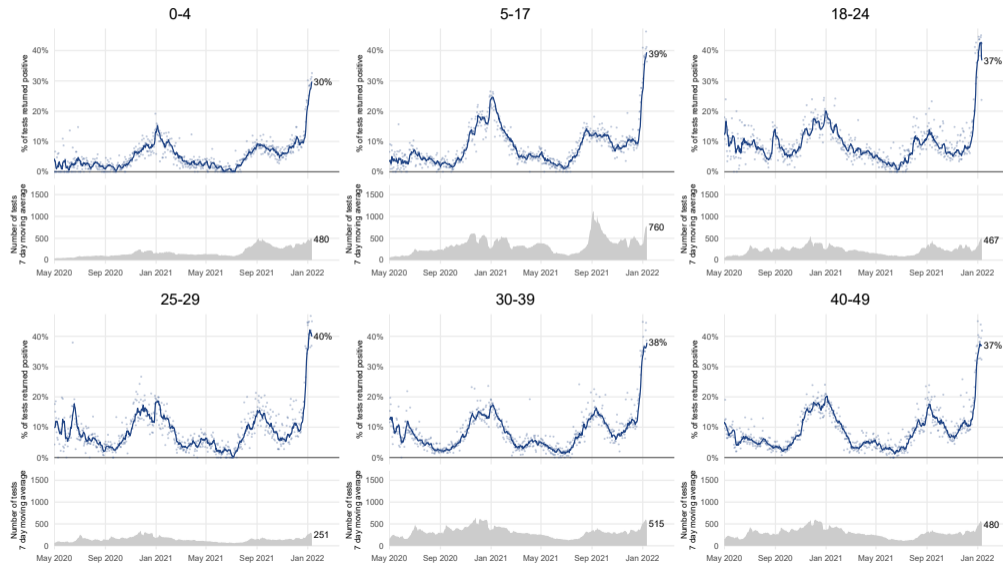

# Percentage of test results returned positive in 14 county region

# Percentage of test results returned positive by age of patient for 14 county area

• % of test returned positive — 7 day positivity rate

Source: The Health Collaborative data as of 01/12/2022. Most recent 3 days highly subject to change.

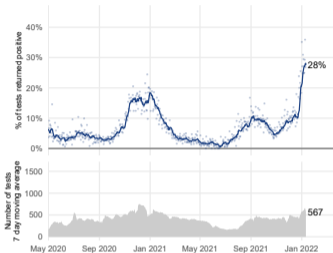

# Percentage of test results returned positive by age of patient for 14 county area

• % of test returned positive — 7 day positivity rate

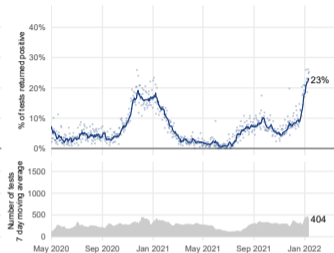

### 50-59

### 60-69

### 70-79

### 80-89

# Number of COVID positive patients in Region 6 hospitals

# Number of positive COVID-19 patients in Region 6 ICUs

Dashed line indicates a temporary centerline that will change over time. Source: Ohio Hospital Association Hospital Resource Tracker on January 12th

# Number of positive COVID-19 patients in Region 6 hospitals

Dashed line indicates a temporary centerline that will change over time. Source: Ohio Hospital Association Hospital Resource Tracker on January 12th

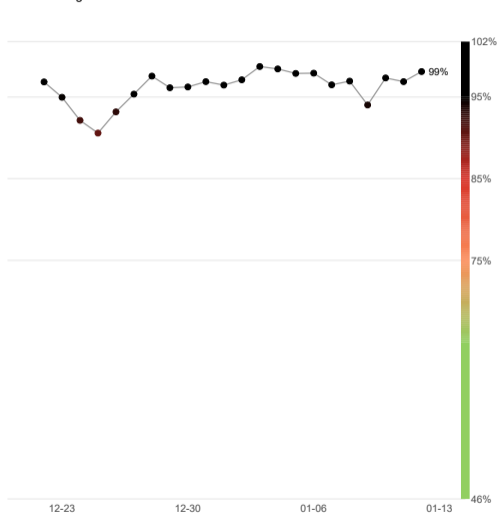

# Percentage of adult beds occupied in the Greater Cincinnati Area

Upper limit reflects currently staffable beds in the area including those beyond the region's normal capacity

### ICU beds

### Medical-Surgical beds

- Usual operations and staffing
- Mild to moderate staffing strain; staff managing higher than usual patient volumes
- Moderate to extreme staffing strain; staff pulled from other areas to manage care outside usual scope
- Critical operations, "all hands on deck", greatest good provided to the greatest number of patients

## Seven day moving average of COVID-19 deaths in Southwestern Ohio

Reports of deaths tend to lag 1-2 months

Source: ODH, Verified deaths by county of residence, [https://coronavirus.ohio.gov/static/dashboards/COVIDDeathData\\_CountyOfResidence.csv](https://coronavirus.ohio.gov/static/dashboards/COVIDDeathData_CountyOfResidence.csv), pulled on: 2022-01-12
